

G4 LOW AIR / DUAL THROW UNIT COOLER

EDEN[®]
The Cool Solution

EPC - High & Medium Temperature Application
Capacity: 2.2kW to 19.2kW

DEPC - High & Medium Temperature Application Dual Air Throw
Capacity: 4.4kW to 38.4kW

Low Noise Level: 49dB(A) to 52dB(A) at 1 meter

Effective Air Throw: 12m to 14m

G4 Low Air / Dual Throw Series Unit Cooler EPC / DEPC

General Features

EPC & DEPC are specially designed for Process Chiller room using the forced draught air flow for better air distribution. They operate at a low noise level of 49dB(A) to 52dB(A) which provide comfortable environment for the people working in the room.

Coils are designed with the Latest Smart Circuitry. It allows maximum massflow rate of refrigerant to be evenly distributed throughout the evaporator, maximizing coil efficiency thus providing higher efficiency and capacity with a smaller physical unit cooler dimension.

Copper Tubes are accordance with JIS. C12T. Inner Groove Tube (IGT) increases the internal coil surface, having a low oil film coefficient thus providing higher efficiency and capacity.

Casing comes in high quality powder coated Aluminum, according to AA 1100 Standard. Centre plates are built in to enhance air side performance and structural strength for models with 2 or more fans.

Fins are produced from high-grade Aluminum (Aluminum Association AA 1100 Standard) with Double Sine Wave Pattern and Rippled Fin Edges to provide higher heat transfer efficiency.

Fan Motors used in all the models are high quality German brand motors, fitted with thermistor motor protection and conform to DIN 40050 safety standards. Fan motors are of the highest quality offered in the industry ensuring long life and durability for both high and low temperature application.

Capacity Ratings are thermally guaranteed by Eden and tested in accordance to ASHRAE dry box standards.

Quality Assurance for all Eden products are designed, manufactured and tested in our factories that are ISO9001 certified.

One Year Warranty for all Eden Heat Exchanger products (Terms and conditions apply).

Options

- a) Copper-Fins Coil (Available only for 6FP to 12FP)
- b) Epoxy-Coated Aluminum Fin Coil (Only on large volume orders)
- c) Passivated Corrosion Protection For All Aluminum Fin Products
- d) Stainless Steel Casing
- e) CO₂ Application On Request
- f) Insulated Drip Tray (For Chiller Only)
- g) Defrost Heaters (For ET -10 °C to -1 °C)

G4 Low Air / Dual Throw Series Unit Cooler EPC / DEPCS

INSTALLATION GUIDE FOR EPC

INSTALLATION GUIDE FOR DEPC

G4 Low Air / Dual Throw Series Unit Cooler EPC / DEPC

ADDITIONAL INFORMATION

Example:

Application: Meat Processing Room

Required Room Temperature: +12°C

Ambient: +35°C

Evaporating Temperature: +2°C at 10KTD

Cooling Capacity: 18kW with Dual Air-Throw capability (Not inclusive of the FCU load)

Type of Refrigerant: R134A

Selection of the Eden G4 Unit Cooler as follow:

1. Determine the Correction Factors and Multiplier (Refers to page 3):
 - a. Capacity Correction Factor is Approximately 1.00
 - b. Refrigerant multiplier = 0.975
2. Calculation of required capacity:
 - a. $18\text{kW} / 1 / 0.95 = 18.46\text{kW}$ (Not inclusive of the FCU load)
3. Determine the FCU load:
 - a. Fan load (6 fans model) = 0.27kW
4. Total capacity (Inclusive of FCU) required:
 - a. Required capacity = $18.46\text{kW} + 0.27\text{kW} = 18.73\text{kW}$
5. Hence a DEPC 2080 is the suitable unit cooler for the above application.

Eden Select:

The Eden Select software enables you to do a refrigeration heat load calculation and select the actual model for the unit cooler and condenser.
